RU-001 Temporary

Code product: 0220001

Light-curing resin suitable for use in combination with extraoral light-curing devices. Biocompatible 3D printing resin for additive manufacturing of temporary crowns and bridges. Temporaries created with **ACRY Print 3D RU-001 Temporary** resin can be fixed with common dental cements. **ACRY Print 3D RU-001 Temporary** consists of functional methacrylic resins and inorganic fillers with particle sizes from 0.4 to 3 microns.

Packaging: 1000g
Shades: A2 - A3

Advantages
Biocompatible materials
Excellent mechanical properties
Low viscosity
Easy clean-up
Radiopaque

MD
CLASSE IIA

RU-002 Model

Cod product: 0220002

Light-curing resin suitable for use in combination with extra-oral light-curing devices. Indicated for the production of prosthetic and orthodontic dental models. **ACRY Print 3D RU-002 Model** consists of functional methacrylic resins, initiators, colorants and stabilizers.
FOR EXTRA-ORAL USE ONLY.

Packaging: 1000g
Shades: Grey

Advantages
High dimensional stability
Optimized aesthetic
Implementable into the digital stream

RU-003 Try-In

Code product: 0220003

Light-curing polymerizable resin to be used along with extraoral light-curing devices. Indicated for the production of functional try-ins, full dentures and aesthetic mock-ups. **ACRY Print 3D RU-003 Try-In** consists of functional methacrylic resins, initiators, dyes and stabilizers.

Packaging: 1000g
Shades: A2

Advantages
Greater biocompatibility
Clinical Safety / Increased Impact Resistance / Significantly improved chemical-physical values
High impact

MD
CLASSE I

RU-004 Denture HI

Code product: 0220004

Light-curing resin suitable for use in combination with extraoral light-curing devices. Indicated for the production of both full or partial dentures and functional denture bases. **ACRY Print 3D RU-004 Denture HI** consists of functional methacrylic resins, initiators, dyes and stabilizers.

Packaging: 1000g
Shades: Orange-Pink

Advantages
High fitting accuracy
High impact

MD
CLASSE IIA

RU-005 Guide

Code product: 0220005

Light-curing resin suitable for use in combination with extraoral light-curing devices. Indicated for the production of splints and prosthetic and orthodontic bite planes. **ACRY Print 3D RU-005 Guide** consists of functional methacrylic resins, initiators, colorants and stabilizers.

Packaging: 1000g
Shades: Trasparent

Advantages
Exceptional stretching
High transparency
High UV stability
Optimal optical control
Sterilizable

MD
CLASSE IIA
